Dear Herman:

I should have sent this to you some time ago. (I issued it as a "P" a considerable time after sending it to the APSR.)

I enjoyed our long talks in Oxford; it's been too long since we had such an opportunity. Our discussion did, however, reassure me as to the relevance of the questions I raised in this brief review. Obviously, there is much more to say about the book, especially in specific terms, as well as about the subject. Perhaps we will have a chance to go over some points, or more current questions, before too long. I hope so.

With best wishes,

Yours,

Daniel Ellsberg
